IEG REPORTING GUIDELINE NO. 16

FURTHER GUIDANCE FOR STATING MEASUREMENTS AND DIMENSIONS  
IN ALL IEG REPORTING

Reference: IEG Reporting Guideline No. 15,  dated 8 Oct. 1969

1. Measurements and dimensions pertaining to installations (e.g., buildings, roads, airfields) should be expressed to the nearest whole unit in both metric and English units.

2. Measurements and dimensions pertaining to objects (e.g., vehicles, missiles, crates, pipes) should be expressed to the most precise unit--to the nearest fractional value, where necessary--in both metric and English units.

3. The publication Units of Weight and Measure, published by the U.S. Department of Commerce, National Bureau of Standards, should be referred to for conversion tables for most weights and measures. Copies of this publication are available in all branches.
